### DETAILED ACTION

1. Prior rejections over Babu '164 are withdrawn in view of amendment.

#### ***Claim Rejections - 35 USC § 102***

2. Claims 6-8 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujii et al. (US 4,331,810).

The claims recite a composition comprising at least two components comprising a specific random copolymer and a solvent, the composition being useful as an adhesive. Fujii discloses in Example A10 the random copolymerization of propylene and 3-methyl-1-butene in heptane, including all claimed limitations of the copolymer. The required solvent component would necessarily be present within the claimed range either during polymerization or during removal of the heptane solvent from the finished polymer. The composition would have utility as an adhesive in view of the disclosure that a recommended use of the disclosed polymers is as a layer in a laminated structure (col. 13, lines 26-31).

#### ***Claim Rejections - 35 USC § 103***

3. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fujii et al. (US 4,331,810).

The parent claim is discussed with respect to this reference above. Although unexemplified, the reference discloses the use of vinyl cyclohexene as the branched

olefin component at col. 5, lines 17-18. One of ordinary skill in the art would be motivated to use this species in the methods disclosed in the reference because patentee has suggested such use.
